# Willow Class - Summer Term 2026

**Welcome to Willow Class!**

We hope you had a wonderful Easter break!

As we step into the final term for our Year 6s, there's an exciting and action-packed journey ahead! From transition sessions and Bikeability to our much-anticipated London residential and school sleepover, the weeks ahead promise to be both memorable and meaningful. We'll be working hard to deepen our learning and prepare for the move to secondary school. It's set to be a term full of fun!

## Learning Journey

This term, our learning journey is titled '**A World Worth Saving**'. We will explore different regions of the world, focusing on biomes and habitats, and discovering the landscapes, cities, and communities that make each place unique.

By studying physical features such as savannahs, rivers, and mountains, alongside human features like towns, schools, and markets, children will develop their map-reading skills and learn to use compass directions and symbols.

Our key text this term will be ***The First Year*** by Matt Goodfellow, helping us reflect on new beginnings, growing up, and caring for the world around us.

The excitement is also building for our Summer production of Matilda! We will begin preparations in the coming weeks.

## PE

Willow class will be having PE on a Friday afternoon this term. All children will need to have their PE kits in school on these days.

## Reading

Reading continues to be a top priority in Willow class, and we would be grateful for your ongoing support in encouraging your child to read both at school and at home.

## Homework

Spellings will be set on SeeSaw. There will also be a a range of activities sent home on rotation to ensure learning is kept fresh, ranging from comprehension, arithmetic and reasoning focuses.

This final term is going to fly by, and we are all excited for the opportunities that await Willow Class. We are determined to make it one to remember and make the most out of every moment! As always, please do contact us if you have any queries, concerns.
